

# Save a life for only £10

## Facts & figures

Did you know that for as little as £5 you could actually save someone's life? It sounds amazing but it is true! That small sum of money will buy malaria treatment for one person that could save the life of the sufferer.

The statistics of the mortality rate from Malaria are quite staggering. A report from the World Health Organisation gave the following estimates for 2006:

- 247 million cases of malaria
- 881,000 deaths
- 91% of deaths were in Africa
- 85% of deaths were children under 5

***"In Uganda it is estimated that 353 Ugandans die every day from malaria, mostly children and pregnant women".***  
(UN Office for the Co-ordination of Humanitarian Affairs)

Mosquito nets can save lives

Through our contacts in Uganda we know that we can provide treatment for malaria for a child or adult for around £5.

Prevention is better than cure and we can also provide treated mosquito nets for £10. The treatment would be provided through Kimywayi Health Centre which is church founded and managed.

## Can you help?

Apart from making a personal cash donation or using our Charity Shop to support the appeal, there are other innovative ways you could get involved:

- Promote this appeal within your church or other group that you belong to and arrange a collection or even a fund-raising event to provide a number of treatments or nets

- Request friends or relatives to donate to this appeal instead of buying you a gift for your birthday or other celebration.

## Make a difference

We believe that everyone can make a real difference with even a small donation through this Project. Please contact the office if you would like promotional material.
