

About this time of year supporters of our Bursary Project would expect to receive an annual report from the school on how the funds have been spent and the progress made.

Unfortunately Gikonko school has suffered as a result of a recent storm and we hope the following pictures and extracts from emails recently received will explain why the usual report will not be forthcoming.

CHI have sent some additional funds to assist with repairs, it is hoped that the school will be fully functional again before the start of the new school year.

We are facing a very big problem resulting from the rain on 27th June, 2011 which destroyed our school. The kitchen, store, library, bursar's office, Deputy head teacher's and discipline master's offices, teaching staff room have been destroyed. Books, materials in the store have been destroyed. It is very challenging. The internet is not functioning, communication is not easy. I shall send some photos. Dear Paul, you pray for us so us to ask God to provide means for repairinig. Thank and God bless you so much.

Donations can be made via the office

Thank you thank you for the messages you sent. We did our best so as to end the second term but hardly. for example we removed students form their dormitory and this one is being used as classroom and teachers are using their classroom as their room to be used in preparing lessons, for the store we are using the refectory,... Dear Paul, you can see that we need support in all aspects: prayers and financial if possible. What we hope is that God, the provider, will help us. Thank once again for encouragment through these messages. God bless you so much.

Yours in Christ.

Emmanuel NIYIBIZI
