Stitches of Hope

Thank you for your support of this project, we are delighted to pass on these pictures and letter recently received from Nalutaaya Prossy. We will continue to keep you updated as further information is received.

Dear my sponsors

I greet you in the name of Jesus Christ and thank you for the good work that you're doing. I thank you for sponsoring my salary.

I joined Kimwanyi Health Centre on the 1st Sept 2011. In the 1st month that I spent at this health centre 5-10 antvirals and 1-3 deliveries but now the number has increased, through out reaches and health talks that I have given to them.

Through these out reaches and health education talks mothers can now manage to space their children by way family planning method. Through immunisation that we're doing, babies are now free from immunisable diseases, like polio, measles, diphtheria, tetanus and others.

On the side of malaria, we're getting a big number of patients, and the drugs that we use to treat malaria are injection Quinine, Coartem tabs, Fansidar, Quinine tabs. For those patients with high temperature we use Panadois, Diclofenac.

Through good counselling people come for HIV/AIDS testing, Hb, SypPhillis and others.

On this work the challenges that we're facing are: Some mothers who come for delivery, they come without money, baby sheets and cotton wool, others don't come back for review and other clients don't come with the money for hospital bills.

Dear my sponsors I ask you to pray me, my kid and husband. Also pray for our health centre, clients and my workmates.

Yours faithfully
